

RAVEN

Try Raven yourself with our 90-Day Pilot

With the Raven Pilot Program, trial Raven Action for 3-months, for just \$4,499, on up to 5 assets. You'll have access to all of the Action features at half the cost.

Get started quickly and demonstrate ROI in as little as 90-days.

Trusted by leading manufacturers worldwide:

How the Raven Pilot Program works

Connect Raven to up to 5 assets and get 3-months of actionable production data, plus ongoing expert support and advice from Raven's team. This means you'll not only optimize and automate your processes using our software, but you'll work with our team of operations leaders, lean practitioners and ex-plant managers to elevate your continuous improvement initiatives and boost operational excellence across your plant.

Consider Raven your extra teammate.

"With Raven, we're able to get real-time production data with callouts and can react in seconds. The software really changed the relationship we have with our frontline." — Mike Gardner, Production Manager, DuraVent Group

Win more. The top Action features you'll test drive on your shop floor.

Raven is the only solution that combines machine data and frontline insights to provide a complete timeline of production events – with context for every second.

Smart Assistants with Alerts/Andon

Replace pen-and-paper with a simple tap using HMIs to capture critical frontline context, by only asking 'smart' questions. Take action with real-time performance insights and alerts.

Gamification with Ahead or Behind Module

Empower your frontline to hit targets with a fast and easy way of knowing when you or your team is ahead or behind schedule. Monitor every hour or shift, with pace-driven green and red indicators.

Contextualized Production Timeline

View 100% of production time and losses in a complete and accurate production event timeline. Identify top performance improvement opportunities, backed by your own data.

Real-Time Reporting Platform

Gain an accurate, bird's eye view of what's happening now and in the past to resolve real-time and systemic issues — fueling your factory's continuous improvement initiatives.

Supercharge your Industry 4.0 tech stack with bolt-on OEE and production tracking software

Raven integrates with existing machines and systems for data harmonization across all your smart factory devices and apps. So you can start identifying areas for improvement as soon as data starts flowing, for rapid time-to-value. Start with a 90-day pilot.
